# TCx™ 700

## Point-of-Sale System

### A workhorse with industry-leading reliability

The TCx™ 700 was designed with high-powered performance in mind. This system supports retailers' current and future applications, can perform during peak busy times and help to minimize expenses. With the 8th and 9th Generation Intel® Core™ S-series processors to choose from, the TCx 700 can support greater work force demands, allowing associates to move between programs and windows more quickly, and boost productivity by doing more tasks with less lag, ultimately improving their efficiency, leading to shorter lines and more opportunities to delight your customers.

TCx 700 supports multiple operating systems including Toshiba's TCx Sky operating system designed specifically for retail. TCx Sky equips retailers with a proven operating system that delivers unrivaled security, smooth integration, and enhanced options; regardless of the retail environment.

### DESIGNED AS AN IDEAL SOLUTION FOR:

**BIG BOX, DEPARTMENT, DISCOUNT STORES**

**GROCERY, SUPERMARKETS, HYPERMARKETS**

**RESTAURANTS, HOSPITALITY**

### Ready for the next generation of retail commerce

With the TCx™ 700, retailers can craft a customizable POS system with features that deliver the performance they need, with the flexibility that their retail environment demands.

This retail-hardened system features next-generation Intel technologies that take performance to a whole new level. Whether that is with the 9th Generation Intel® vPro™ platform to provide retail businesses with the tools to efficiently manage and help secure POS endpoints or leveraging Remote Management Agent which can be enabled to automate deep sleep mode. It also allows system monitoring from a single console - in-store or remotely. This way, service technicians have quick access to the POS system and devices when it's time to update software and security protections and to keep tabs on system health.

We've also made the TCx 700 POS system affordable to manage and maintain:

- > Low maintenance systems naturally live longer and perform at a higher level over time
- > Equipped with energy-conscious features that help prolong the life of device and save your business up to 37 percent\* in energy costs
- > Deep sleep mode allows the system to operate with minimal energy when checkout lanes are idle, then wakes up in seconds when your associates are ready to help a customer
- > Customizable internal components allow flexible choices in hardware configuration to fit your retail needs

#### Retailers

A POS system that's made to adapt to your business – not the other way around.

#### Associates

Information light and failure messages pro-actively monitor system status and help associates avoid downtime

#### Customers

Enjoy a more engaging, interactive experience and a faster, smoother checkout process

### Designed to be easier to install, maintain, and manage:

- > Virtually tool-free access to key components
- > Sensor driver for proactive monitoring
- > Scalable memory up to 64 GB
- > Optional integration tray
- > Two SurePorts, for flexibility as you customize your system
- > Embedded security features protect against viruses and hackers to reduce critical downtime

### Grow your business seamlessly and securely

With a service lifecycle of up to seven years and highly scalable technology that integrates with legacy systems, you can get the most from your investment in TCx 700 today – and into the future. As with every Toshiba retail solution, system and peripherals, TCx 700 was created with compatibility at its core. Every detail – down to the latching connection – is designed and optimized to work together as a total store solution. So, when it's time to upgrade your devices, applications and maintenance services, the TCx 700 POS system can evolve right alongside your business.

\*Based on internal testing
