TCx™ 300

Compact POS System

A POS system that's packed with possibilities

Thoughtfully designed with space-saving flexibility in mind, the TCx™ 300 is made for retailers that prioritize efficiency. When space on the checkout counter is limited, retailers need a compact point-of-sale system that can support their current and future applications, perform during peak busy times and help to minimize expenses. The TCx 300 can meet that challenge - all in a compact footprint that's less than 11 inches wide.

With the 8th and 9th Generation Intel® Core™ S-series processors to choose from, the TCx 300 can support greater work force demands, allowing associates to move between programs and windows more quickly, and boost productivity by doing more tasks with less lag, ultimately improving their efficiency, leading to shorter lines and more opportunities to delight your customers.

TCx 300 supports multiple operating systems including Toshiba's TCx Sky operating system designed specifically for retail. TCx Sky equips retailers with a proven operating system that delivers unrivaled security, smooth integration, and enhanced options; regardless of the retail environment.

DESIGNED AS AN IDEAL SOLUTION FOR:

- BIG BOX, DEPARTMENT, DISCOUNT STORES
- GROCERY, SUPERMARKETS, HYPERMARKETS
- RESTAURANTS, HOSPITALITY

Sized right for any checkout environment

All of our POS Systems boast a low cost of total ownership over the life of the system, the TCx™ 300 is no different. But don't let its small foot print or affordability fool you.

This retail-hardened system features next-generation Intel technologies that take performance to a whole new level. Whether that is with the 9th Generation Intel® Core™ i5 and i7 processors which support the Intel® vPro™ platform to provide retail businesses with the tools to efficiently manage and help secure POS endpoints or leveraging Remote Management Agent which can be enabled to automate deep sleep mode. It also allows system monitoring from a single console – in-store or remotely. This way, service technicians have quick access to the POS system and devices when it's time to update software and security protections and keep tabs on system health.

We've also made the TCx 300 POS system affordable to manage and maintain:

- Low-maintenance systems naturally live longer and perform at a higher level over time
- Equipped with energy-conscious features that help prolong the life of the device and save your business up to 37 percent* in energy costs
- Deep sleep mode allows the system to operate with minimal energy when checkout lanes are idle, then wakes up in seconds when your associates are ready to help a customer
- Customizable internal components allow flexible choices in hardware configuration to fit your retail needs

Retailers
A POS system that's made to adapt to your business – not the other way around.

Associates
Designed to minimize downtime so your associates can spend time doing what they do best – serving your customers.

Customers
Enjoy a more engaging, interactive experience and a faster, smoother checkout process

Designed to be easier to install, maintain, and manage:

- Virtually tool-free access to key components
- Sensor driver for proactive monitoring
- Scalable memory up to 64 GB
- Embedded security features protect against viruses and hackers to reduce critical downtime
- Replaceable SurePorts ensure retailers can integrate TCx 300 with existing equipment and applications – and upgrade later
- Multiple Connection Ports: (2) USB-C Ports
- Optional additional hard drive

Ready to Go Day 1 and Beyond

With the TCx 300, you can take the guesswork out of future upgrades for your front-end solution - no matter how retail evolves. When you invest in the TCx 300, you'll get broad operating system support along with service and parts that are available up to seven years after withdrawal. As with every Toshiba retail solution, system and peripherals, TCx 300 was created with compatibility at its core. Every detail – down to the latching connection – is designed and optimized to work together as a total store solution. So, when it's time to upgrade your devices, applications and maintenance services, the TCx 300 can evolve right alongside your business.

*Based on internal testing
